Summary

I'm a final year Computer Science student majoring in Software Development at Swinburne University, driven by a passion for technology, continuous learning, and meaningful impact. I enjoy exploring new tools and technologies and developing personal projects. I'm especially passionate about using my skills to build software that improves lives and solves real world problems. Currently, I'm focused on gaining hands-on industry experience to grow as a software engineer and contribute to impactful, user-centred solutions.

Education

Swinburne University of Technology

Expected Graduation: July 2026

Bachelor of Computer Science | Major Software Development

- Relevant Coursework: Data Structure, Algorithms, Object Oriented Programming, Software Architecture, Cloud Computing Architecture, Computer System, Network Switching, Network Security and Resilience.

Holmesglen

Feb 2022 - Apr 2023

Certificate IV in Web Development

- Relevant Coursework: Static and Dynamic Webpage, Fetch data from external APIs and Authentication using PHP.

Work Experience

Focus Bear

Aug 2025 - Nov 2025

Back End Developer Intern

- Incoming Intern at Focus Bear, leveraging **Javascript** and **NodeJS** in developing server-side components and APIs to support the platform.

Projects

GamerQuest | [Source](#)

2025

Full Stack Website | VueJS, Vuetify, PHP & MySQL

- Developed and deployed a full-stack web application, a social web application where users can discover new games, write reviews, and manage their personal game library.
- Utilised **VueJS** for the user interface, **PHP** for a backend and **MySQL** for data storage and deployed on university Mercury server.

PropertyLens | Back End Developer | [Source](#)

2024

Full Stack Website | ReactJS, FastAPI, ChartJS, Material-UI & Artificial Intelligence Model

- Developed an AI model integrated full-stack web application, the platform incorporates an AI model for predicting house prices and categories.
- Utilised **FastAPI** for **RESTful API** backend, **ReactJS** and **Material UI** for the user interface, **Python** for builds and packaged simple **AI model** and **ChartJS** for data visualisation.

Lunatia Project | [Source](#)

2024

Texted Based RPG Game | C#, Object Oriented Programming & Design Pattern

- Developed a text based rpg game builds with **C#**, focusing on **object oriented programming** and application of **design patterns** to solve problem with best practices.

Technical Skills

Languages: JavaScript, TypeScript, C#, C++, Java, Python, HTML5, CSS, PHP, SQL.

Developer Tools: Git & GitHub, PostmanAPI, AWS.

Libraries/Frameworks: ReactJS, VueJS, NodeJS, TailwindCSS, DaisyUI, Bootstrap, Spring Boot.
