Summary

A final-year **Computer Science** student majoring in **Software Development** at Swinburne University, driven by a passion for technology, continuous learning, and meaningful impact. I enjoy exploring new tools and technologies and developing personal projects. With a recent focus on **cybersecurity**, demonstrated by ethical hacking coursework and job simulation certificates from Forage by Commonweal Bank and Mastercard, I recognize the deep interrelation between secure software development and robust cybersecurity practices. I'm passionate about building software that improves lives and solves real-world problems and am actively seeking hands-on industry experience in **both software engineering and cybersecurity**, understanding that expertise in either field will significantly contribute to my growth.

Education

Swinburne University of Technology Expected Graduation: July 2026

Bachelor of Computer Science | Major Software Development

- Relevant Coursework: Data Structure, Algorithms, Object Oriented Programming, Software Architecture, Cloud Computing Architecture, Computer System, Network Switching, Network Security and Resilience.

Holmesglen Feb 2022 - Apr 2023

Certificate IV in Web Development

- Relevant Coursework: Static and Dynamic Webpage, Fetch data from external APIs and Authentication using PHP.

Work Experience

Focus Bear Aug 2025 - Nov 2025

Back End Developer Intern

- Incoming Intern at Focus Bear, leveraging **Javascript** and **NodeJS** in developing server-side components and APIs to support the platform.

Projects

GamerQuest | [Source](#) 2025

Full Stack Website | VueJs, Vuetify, Bootstrap, PHP & MySQL

- Developed and deployed a **full-stack social web application** where users can discover new games, write reviews, and manage their personal game library.
- Utilized **VueJS**, **Vuetify** (for UI components and input validation), and **Bootstrap** for the user interface, alongside **PHP** for the backend and **MySQL** for data storage, demonstrating proficiency in modern web development frameworks and database management.

PropertyLens | Back End Developer | [Source](#) 2024

Full Stack Website | ReactJS, FastAPI, ChartJS, Material-UI, Collaborative Development & AI Model Integration

- Played a key role as a **Back End Developer** in building an AI model-integrated full-stack web application designed to predict house prices and categories.
- Designed and implemented resilient **RESTful API** endpoints using **FastAPI**, serving as the backbone for data exchange between the frontend and the AI model.
- Successfully packaged and seamlessly integrated a Python-based AI model into the web application, enabling real-time predictions.
- Contributed to the frontend with **ReactJS** and **Material UI**, specifically developing interactive data visualizations using **ChartJS** and ensuring accurate processing of user inputs for AI predictions.
- Proactively introduced and managed **Git/GitHub** for **version control**, establishing efficient feature branching strategies and overseeing code integration, including thorough pull request reviews, to maintain code quality and foster team collaboration.

Lunatia Project | [Source](#) 2024

Texted Based RPG Game | C#, Object Oriented Programming, Unit Test & Design Pattern

- Developed an advanced text-based RPG game in **C#**, applying **Object-Oriented Programming (OOP)** principles and **design patterns** to create a scalable, modular and maintainable application structure.
- Extended game functionality by integrating advanced **C#** concepts like **Language-Integrated Query (LINQ)** and robust handling of external data files (JSON/text).
- Ensured high code quality and reliability through the implementation of comprehensive **unit testing** using **NUnit**.

Certificates

Commonwealth Bank - Introduction to Cyber Security

July 2025

Forage | Job Simulation

- Completed a job simulation involving the role of a cybersecurity generalist, specializing in fraud detection and prevention for Commonwealth Bank's Cybersecurity team.
- Developed skills in building data visualization dashboards using **Splunk** to uncover patterns and insights in historical customer data, aiding in fraud detection.
- Demonstrated the ability to **respond** effectively to **cybersecurity incidents**, including notifying relevant teams, collecting information, containing and stopping attacks, and aiding in recovery efforts.
- **Enhanced security awareness** expertise by designing infographics promoting best practices for secure password management, following Australian Cybersecurity Centre advice.
- Acquired practical experience in **penetration testing**, assessing the security of web applications, identifying vulnerabilities, and providing recommendations for remediation to bolster cybersecurity defenses.

MasterCard - Cyber Security

July 2025

Forage | Job Simulation

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team.
- Helped identify and report security threats such as phishing.
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams

Technical Skills

Languages: JavaScript, TypeScript, C#, C++, Java, Python, HTML5, CSS, PHP, SQL.
Developer Tools: Git & GitHub, PostmanAPI, AWS, Kali Linux.
Libraries/Frameworks: ReactJS, VueJS, NodeJS, TailwindCSS, DaisyUI, Bootstrap, Spring Boot.

Interests

Software Development : Software Engineering, Software Architecture & Software Design.
Cyber Security : Ethical Hacking, Incident Response & Cyber Security Analyst.
